

Falls affect a person's ability to live life independently. Oval, the world's smallest and most innovative fall detector, gives users immediate help regardless of their ability to make a call or press the help button.

Small but powerful and secure.

Oval is the smallest and most accurate fall detector available. Designed to be carried anywhere, Oval automatically detects a fall and sends a help signal through the base unit to the monitoring station. If movement is recorded within the programmed transmission delay time (0 - 99 seconds), the call will be canceled. The call can also be canceled with an 8 second press of the help button. Although lightweight and small in size, Oval is highly resilient and able to withstand any situation.

Safety wherever you need it.

Bathrooms and kitchens are the most common areas for fall incidents since water is a major slipping hazard. Rubber sealed and fully waterproof, Oval can be used in the shower or kitchen without worry. An effective range of 130 m [400 ft] in open space and a battery life of over 2 years give Oval users peace of mind. Help is assured regardless of one's ability to press a button. The wide range and long battery life increase confidence and mobility for users.

Detailed Features

- Automatic fall detection through multiple accelerometers and sensors
- Programmable transmission delay time of 0 – 99 seconds
- Can cancel help calls or false alarms with an 8 second press of the help button
- Low battery detection
- Ultra low power consumption
- World's smallest fall detector
- Able to answer incoming phone calls on the home phone line with a press of the button
- IP45 waterproof design
- Can be worn around the neck as a pendant
- Adjustable lanyard with a breakaway safety snap closure

Technical Specifications

Compatible devices:	Nova; Apex; Apex V
Frequency:	433 MHz
Range:	Up to 130 m [425 ft] in open space
Power:	Replaceable 3V CR2477 lithium battery
Battery life:	2 years or more*
Operating temperature:	-10° to 40°C
Operating humidity:	Up to 90% non-condensing
Dimensions:	58.6 X 42 X 19 mm

*Battery life is calculated at an average of one activation per day.
