

YOUR SYSTEM, NOW AT YOUR FINGERTIPS

FULL CONTROL, MORE FLEXIBILITY

Have full control of your system with Epic Safety's alarm communicators and **Aryo cloud platform+ app**. A complete, convenient, encrypted and easy-to-use solution that gives you the flexibility to **remotely interact with your security system** by simply pressing commands and/ or using a **mobile keypad**.

MODERNIZE YOUR SYSTEM, EASILY

surf series and aero-k communicators alongside Aryo, always communicate with your system using **LTE, Ethernet or Wi-Fi**, linking your system to our cloud platform **reliably at all times**. And that's not all, it is **compatible with most alarm systems**, from older models to newer ones!

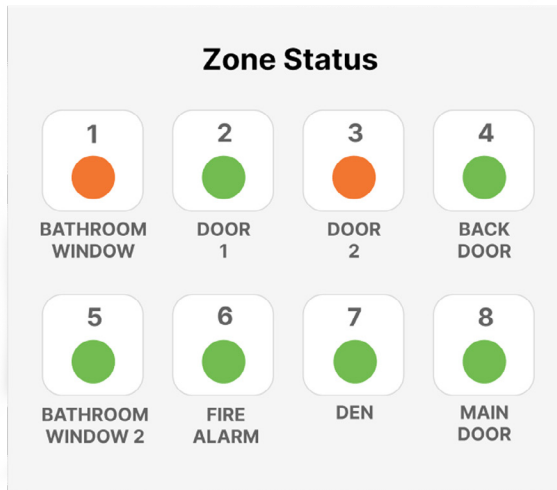

EVERYTHING YOU ALREADY DO, BUT BETTER

Imagine having all the functionalities you have on your alarm keypad and more, but now on your phone. That's what Aryo gives you! Features such as:

- Manage multiple alarm systems within the same app
- Assign multiple users with different levels of permissions
 - Remote arm and disarm and system status
- Cancel false alarms and take immediate action on other events
 - Sub-user and user code management

PEACE OF MIND: ANYWHERE, ANYTIME

- You are out and want to know if **someone entered or left your house**
- You are out and want to check if **a door or window is left open**
- You are on vacation, and **something happens at your property** that requires entry
 - You are **not sure if you armed your system**
- You **want to know if your kids arrived from school**

Aryo allows you to deal with these scenarios and more, sending notifications (**Push, Email and/ or SMS**) + **Audible Notifications** of all the events and allowing you to **remotely make informed decisions about your system** even before the monitoring center is contacted!

AUDIBLE NOTIFICATIONS

Enhance the user experience by providing audible notifications for emergencies, ensuring users are alerted immediately for complete peace of mind.

A TOTALLY CUSTOMIZABLE EXPERIENCE

With surf k/km, aero-k and Aryo app, you can **view zone and partition status, label zones and have more information on your system.** They also allow you to **easily bypass specific zones and check the performance of your system** from anywhere.

 Proudly Canadian.
