Interactive Takeover Alarm Systems and Cloud Platform

Epic Safety brings you a line of takeover alarm systems that offer comprehensive hardware, firmware, cloud platform and LTE / IP connectivity.

Key Benefits for Dealers

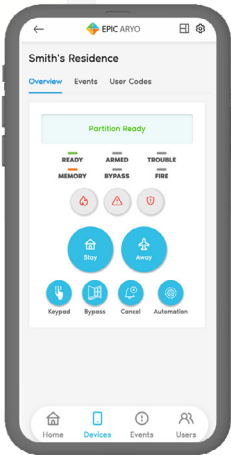

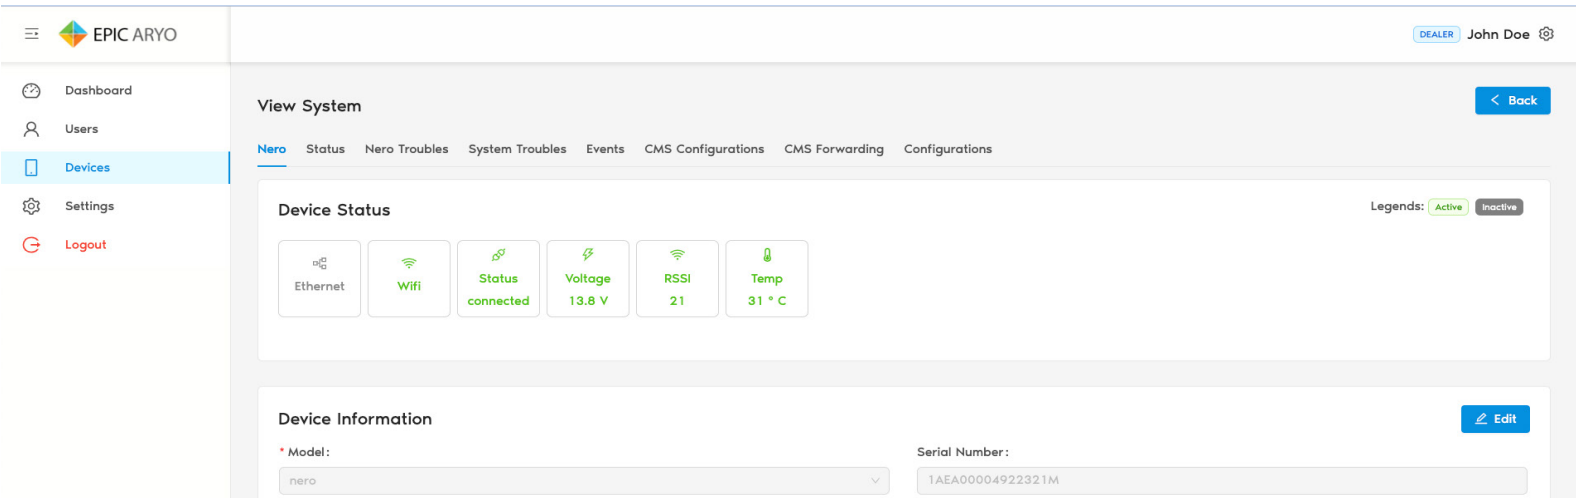

- Takeover and modernise any existing alarm systems and increase your MRR.
- Upgrade your 3G communicators and replace older systems with an all-in-one integrated solution.
- Upgrade to cutting-edge technology by replacing your outdated legacy equipment.
- Minimize service calls with remote programming and the power of our system diagnostics.
- Streamline your installation to save time and resources by using our integrated system.
- Upgrade and replace traditional landline systems.
- Say goodbye to keypad and upload/download programming.

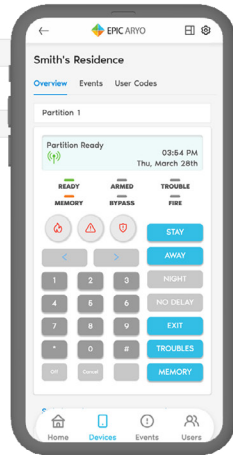

The World's **Smallest** Integrated and
Interactive Takeover Alarm Systems

Group Bypass

Deliver Exceptional User Experience

- Mobile app integration for on-the-go control and monitoring via smartphones and tablets.
- End-to-end device and user data encryption for enhanced protection.
- Multi-factor authentication for user verification.
- Multiple language support for user interface.
- Emergency buttons for immediate response activation.
- Single and group zone bypass and un-bypass functionalities.
- Effortless cancellation of false alarms and dispatch of resources.
- Customizable user permissions and access levels for tailored security settings

Innovative and Game-Changing

Our comprehensive dashboard serves as a centralized hub for device and user management, offering:

- Comprehensive event reporting to Aryo Cloud and monitoring stations.
 - Full control with commands and mobile keypad interactions.
 - Monitoring of partition and zone status, including entry delay.
 - Customizable push, email, SMS, and audible notifications.
 - Multiple arming modes available.
 - Easy cancellation of false alarms.
